[Exhibitor statements on wire and Tube 2014](#)

*Gianluca Tarana, Sales Manager at Olimpia 80 Tube Mills from Italy, associates Tube with the steady growing history of his company. "We started with a three members of staff and a very small booth 20 years ago and are very satisfied with our development until today. Tube is the best occasion worldwide to meet serious customers with concrete projects. We present them our innovations, like our newest line for square and rectangular tube shaping without roll changing. They clarify their needs and orders come in right after this exhibition. To sum it up: If you are not present here, you simply do not exist!"*
